

MeanFlowPrecond MF_θ — average-velocity residual head (Stage 2, trained)

SongUNet · 14 ch in → 4 ch out · 81,040,772 params · 55 UNetBlocks · grid 192×96 · same backbone as the FlowCast / EDM heads — only objective and time embedding differ

Σ params: mapping 0.33 M · spatial emb 2.36 M · encoder 26.71 M · decoder 51.64 M · **total 81,040,772**

☐ data / tensors ☐ SongUNet stage ☐ time embedding $\dashrightarrow$ skip
